

M- Cloud Week in the Government

AGENDA February 11 - 15, 2013

The Government of Moldova launched in 2010, the technological modernisation of the public sector to boost efficiency and transparency for the benefit of general public. Shared Government Technological Platform M-Cloud represents one of the main pillars for the government technological modernisation and driving force for increasing quality in data management, e-services delivery and information security.

A serie of events will be hosted by the Government of Moldova in the week of February 11-15, 2013 that will bring together governmental officials and IT professionals from both public and private sectors to tackle policy framework and technological aspects of M-Cloud in the Government
